If you have a Telemedicine appointment with one of our docs, please make sure you are ready for your visit by doing the following:

- Please make sure that your internet is working and your camera and microphone are turned on;
- If using a laptop or workstation- you must use google chrome;
- Have your phone ready as a back-up if your laptop or workstation poses difficulty for whatever reason during your telemedicine visit;
- Make sure you are in a private area so that you can give the doctor your full attention during your visit and you are not distracted and/or walking around.

****** Remember ******

This is an office visit no different than if you were in the office with your physician.

Your co-pay applies and your visit will be submitted to your insurance carrier.
